Release Notes — AI Writing Assistant v2.0

November 2025

🚀 Overview

This update introduces improved multilingual capabilities, enhanced accuracy, and new integrations for the AI Writing Assistant.

🆕 New Features

- **Multilingual Support:** Added full support for German, Hungarian, and Ukrainian.
- **Context Awareness:** The model now maintains better conversation memory across turns.
- **Live Feedback Dashboard:** Added a monitoring feature using Grafana for latency and accuracy.

🛠️ Improvements

- Reduced response latency by 20%.
- Enhanced sentence-level fluency for long-form text.
- Improved safety filters for factual correction.

🐛 Bug Fixes

- Fixed occasional JSON formatting errors in API responses.
- Corrected token-count mismatch in streaming output.

📅 Next Release

- Voice output integration (Beta planned for January 2026)
- Support for on-device inference (research preview)
