PROFESSIONAL SUMMARY

Senior Technical Writer with 6 years of experience in documentation governance, knowledge management, and process standardisation. Sole Technical Writer responsible for 400+ knowledge assets across 7 departments, establishing organisation-wide documentation standards, template frameworks, review cycles, and content-governance practices. Experienced in AI/ML systems, API documentation, MLOps platforms, incident management, and operational process design, with demonstrated ownership of business-critical documentation systems and workflows

CORE COMPETENCIES

Documentation Governance & Documentation Standards | Knowledge Management | Information Architecture | Template Framework Design | Process Mapping & Standardisation | Content Lifecycle & Audits | Confluence & Jira Administration | Incident & Service Operations | Onboarding Frameworks | API & MLOps Documentation | User Stories & Journey Mapping | SEO & Content Systems

PROFESSIONAL EXPERIENCE

Senior Technical Writer | Documentation Governance Oct 2022 – Jun 2026 *GC Software Development GmbH · Hamburg, Germany*

Sole Technical Writer; contractual partner to Booming Games (Malta) Ltd.

Documentation Governance & Standards

- Owned documentation governance across 7 departments as the primary author, reviewer, and approver for 400+ knowledge assets, establishing organisation-wide standards, review cycles, and content ownership practices.
- Designed and implemented the organisation's master documentation template framework, standardising structure and quality across Product, Operations, Finance, Compliance, Incident Management, and Customer Support.
- Conducted recurring documentation audits and gap analyses across business functions, improving consistency and acting as the final quality gate.

Process Documentation & Onboarding

- Documented and maintained 40+ end-to-end processes and 100+ supporting workflows, creating auditable sources of truth that reduced reliance on undocumented tribal knowledge.
- Developed organisation-wide and third-party integration onboarding frameworks, creating repeatable knowledge-transfer models that remain in operational use for employee and customer onboarding activities.
- Produced process maps, swimlanes, and workflow models adopted as the primary reference for business-critical operations.
- Created onboarding documentation and implementation guides supporting third-party gaming integrations through GC Software Development GmbH's partnership with Booming Games, providing a repeatable framework used for customer onboarding and integration delivery.

Incident Management & Compliance

- Created incident response procedures, escalation workflows, and playbooks; maintained Jira workflow and change-management records used during live incidents.
- Documented billing, reconciliation, and exception-handling with Finance and Compliance to meet audit and internal-control expectations.

Technical Writer Jan 2021 – Sep 2022 *Betinvest • Remote*

- Produced technical documentation, release notes, and user-facing content with engineers, QA, and product managers.
- Maintained knowledge repositories, improving content organisation and discoverability; supported coordinated release cycles.

SELECTED PORTFOLIO WORK

Representative documentation samples demonstrating documentation governance, process design, MLOps, API documentation, developer experience, and operational workflows. Full portfolio available at lesliewrites.tech/portfolio.

- [Documentation Architecture](#): information architecture, ownership model, content lifecycle, and governance for 400+ assets.
- [Incident Response & Jira Workflow](#): post-incident analysis with 5-Whys RCA and governed, multi-team ticket workflows.
- [Patient Outcomes Datasheet](#): data governance de-identification, intended-use limits, and prescribed fairness checks.
- [Helios](#) & [Atlas](#) (MLOps / API): model-serving architecture, runbooks, RACI, and Stripe-style developer-experience references.
